

# w3.immobilien

---

German real estate • Immobilien • portals • tokenization

## Positioning

w3.immobilien is positioned as a seven-figure strategic brand asset: category authority + trust signal + competitive

## Why it wins

- Exact-match in German — Immobilien is the category word. That clarity increases trust and organic recall in DACH markets.
- Perfect for verification — Ideal for listing authenticity, document workflows, and proof-of-ownership education.
- Tokenization optionality — If property rails modernize, category domains become strategic brand moats.

## Best-fit buyers

- German real estate portals and listing marketplaces
- Broker networks and franchise groups
- Mortgage / insurance partners serving Immobilien buyers
- PropTech workflow and verification providers
- RWA tokenization platforms targeting DACH

## Process

- Terms shared privately under NDA
- Escrow closing (Escrow.com or equivalent)
- Standard registrar transfer
